

## **Chief Report July 2023**

MCAD answered 525 calls for emergency service in June. Base 1 (Hannibal)- 2711 handled 137 calls, 2721 handled 138 calls, Base 2 (Hannibal) handled 167 calls, Base 3 (Palmyra) handled 78 calls, and we had 32 on-duty transfers and 5 off-duty.

The Administration building is still waiting for the siding contractor to do the siding. He had several jobs before ours.

Work on the District web page is ongoing. It is public now, although we are still making a few additions and corrections. Everything needed for compliance is in place, though.

The CMS Cost Reporting is complete and has been uploaded. We hope that this is a “one and done” deal because it took a massive amount of work on everyone’s part.

Southwest completed the installation of the AV equipment in the training room. We will be working with Steve to get all instructors trained. It is simple to work, and it will be a huge improvement for training.

Brandon Buckman from Air Evac and I met with staff at NE Power to discuss possible upgrades to the helipad there. Several ideas and suggestions were offered, and we will continue to work together for the good of the Palmyra community and surrounding area.

I attended the Hannibal Emergency Management meeting to do a NTSD debriefing and discuss ways to improve operations and communications for the event, along with the expected impacts of the 3<sup>rd</sup> street viaduct closure soon.

AEDs are back on an extended shipping time of 8-10 months. We have several ordered for the area but it will be some time before we receive them and put them in place.
