Scope of Work

Regardless if stated elsewhere, this proposal is only good for 15 Days from the time it is delivered.

THIS QUOTE INCLUDES 2 OPTIONS

Option 1:

This quote is to replace existing camera system at the Marion County Ambulance District Administration Office. ASI will remove all existing cameras and replace all cameras with cameras similar to those already in place. All cameras will be aimed to match existing views, unless otherwise requested by customer. ASI will utilize all cabling already in place. ASI will then remove the existing NVR and replace with an updated NVR with a 12TB hard drive. ASI will test and label all existing wiring. ASI will compile a list of cameras (make and model), MAC address and IP address and location of install. ASI will complete all necessary programming and provide customer training if requested. ASI will dispose of all removed equipment unless requested to leave with the customer.

NVR will be Exacqvision and similar to the operating system currently in place. This quote does not include network switches which will be provided by the customer unless otherwise requested, at which time a change order will be created to include network switches. This quote does include 3 years of camera licensing for the cameras quoted. If additional cameras will be added within 3 years, it is recommended to add the license with the quote. License purchased separate of the NVR are valid for 1 year. After the license expires in 3 years an annual license will be required per camera. Additionally these NVRs will reboot automatically in the event of a power outage upon power being restored.

Option 2:

This quote is to replace existing camera system at the Marion County Ambulance District Administration Office. ASI will remove all existing cameras and replace all cameras with cameras similar to those already in place. All cameras will be aimed to match existing views, unless otherwise requested by customer. ASI will utilize all cabling already in place. ASI will then remove the existing NVR and replace with an updated NVR with a 18TB hard drive. ASI will test and label all existing wiring. ASI will compile a list of cameras (make and model), MAC address and IP address and location of install. ASI will complete all necessary programming and provide customer training if requested. ASI will dispose of all removed equipment unless requested to leave with the customer.

NVR in option 2 will include a user friendly work station, Mobile application and POE+ powered to eliminate the need for network switches. This quote includes lifetime licensing for each camera with no recurring annual cost. Addition of cameras will require a 1 time purchase of a license. Additionally these NVR's will reboot automatically in the event of a power outage upon power being restored.

The following includes both options:

This quote does not include wire or labor to install wire. In the case of a faulty cable, a change order will be created or if agreed upon with the customer, the work will be complete at a time and material rate.

Camera Styles include:

- 5 dome cameras
- 4 bullet camera
- 1 panoramic camera

Scope of Work

Regardless if stated elsewhere, this proposal is only good for 15 Days from the time it is delivered.

THIS QUOTE INCLUDES 2 OPTIONS

Option 1:

This quote is to replace existing camera system at the Marion County Ambulance District Base 1. ASI will remove all existing cameras and replace all cameras with cameras similar to those already in place. All cameras will be aimed to match existing views, unless otherwise requested by customer. ASI will utilize all cabling already in place. ASI will then remove the existing NVR and replace with an updated NVR with a 12TB hard drive. ASI will test and label all existing wiring. ASI will compile a list of cameras (make and model), MAC address and IP address and location of install. ASI will install a 40 inch wall mounted monitor to allow for staff to view cameras to increase security when leaving the facility. The monitor location will be determined at the time of install. (HDMI cable will need to be ran from NVR to monitor). ASI will complete all necessary programming and provide customer training if requested. ASI will dispose of all removed equipment unless requested to leave with the customer.

NVR will be Exacqvision and similar to the operating system currently in place. This quote does not include network switches which will be provided by the customer unless otherwise requested, at which time a change order will be created to include network switches. This quote does include 3 years of camera licensing for the cameras quoted. If additional cameras will be added within 3 years, it is recommended to add the license with the quote. License purchased separate of the NVR are valid for 1 year. After the license expires in 3 years an annual license will be required per camera. Additionally these NVRs will reboot automatically in the event of a power outage upon power being restored.
